How to Choose LED light equivalent to your existing CFL/traditional bulb

Traditional 40W 15W CFL 5W LED

**The right
LED Bulb
equivalent to a
Traditional/CFL
Bulb**

	Traditional Bulb	CFL Bulb	LED Bulb	Lumens
Watt	40-60W	12W - 15W	4W - 5W	450
	60W-75W	15W-18W	6W - 8W	890
	75W-100W	18W - 23W	9W - 13W	1210

Using the conversion chart above find your LED equivalent bulb which gives the same amount of brightness. For example, if you are using a traditional (incandescent) bulb in the range of 40-60W you need a LED bulb in the range of a 5W-8W as it is equally bright (450 lumens) & hence will give you same amount of brightness with less power consumption. **This in turn saves your money as it reduces your electricity bill.**
